

Remix Bulgaria LTD uses three axles' semi-trailer ADR T PED and platform manufactured by SCHMITZ CARGOBULL and installs the batteries of cylinders in its base in Sofia city. The guarantee term is 12 (twelve) months for the cylinder installation, attached on the semi-trailer or individually, 24 (twenty-four) months full guarantee of the semi-trailer (manufactured by SCHMITZ CARGOBULL), 10 (ten) years guarantee against corrosion of the frame, 6 (six) years or one million kilometers run of the drive mechanism.

In the above installments new cylinders for methane, manufactured by DALMINE according to Directive 99/36/EU and EN 1964-1 (TPED) – used for transportation of compressed natural gas, are used. The indicated directives and standards refer to cylinders, designed for transportation and storage of compressed natural gas in battery vehicles and/ or installed on vehicles for transportation of natural gas (semi-trailers, platforms, trucks and others). A DALMINE cylinder with a capacity of 90 liters with dimensions: diameter 273 mm; length 1847 mm; weight 85 kg. according to chart N° XE00-5-E-300-n-1. Operation pressure– 200 bar. Outlet vent with carving W28,8 DIN 477.

The experience of Remix Bulgaria LTD in the utilization and manufacturing of semi-trailers, gas bundles and battery vehicles – stationary and installed on vehicles – shows the economic profitability from the utilization of larger in volume cylinders to cut the costs for additional materials, necessary for the connection of bottles in the battery (less taps and tee-joints, fittings, tubes and fixing elements). Furthermore, with larger in volume cylinders a better ratio in price/liter is achieved and less expenses are made for cylinder technical examination, which is mandatory each 5 years.

The semi-trailers will be delivered with Declaration of conformity (TPED 99/36/CE, EN 1964-1), International ADR Certificate, Passport and Registration Certificate as Special Vehicle.

OFFER FOR NEW SEMI-TRAILERS, PLATFORMS AND BATTERY VEHICLES (GAS BUNDLES) FOR TRANSPORTATION OF COMPRESSED NATURAL GAS (METHANE)

My name is Lubo Ganev – manager of Remix Bulgaria LTD Company, which is exclusive agent for Bulgaria of the Italian companies BRC and SICOM for modular methane stations for motor vehicles with compressed natural gas (methane) and the company DALMINE manufacturing methane cylinders. I would like to present you an offer about new semi-trailers, platforms and gas bundles, assembled with DALMINE cylinders intended for transportation and storage of compressed at 200 bar natural gas (methane). All semi-trailers and battery vehicles manufactured by Remix Bulgaria LTD comply with all requirements and standards of Bulgaria and the EU and have an approved certificate for transport of gases under pressure and inflammable loads - ADR. All semi-trailers and battery vehicles are tested and legalized in Bulgaria and EU.

REMIX BULGARIA LTD was established in 2000 as a trading company with manager Lubo Ganev.

REMIX BULGARIA LTD deals in design, manufacturing and selling of cylinder batteries, platforms, trailers and semi-trailers for storage and transport of CNG, building and maintenance of CNG stations, import and distribution of automobile CNG fuel installations and methane cylinders. The Company is exclusive representative for Bulgaria of the Italian companies SICOM and BRC producing full range of stations for car refueling with CNG (in short called CNG stations); CILBRAS, FABER and DALMINE- manufacturing methane cylinders; EMER and FOR – fittings and components for CNG systems; TARTARINI AUTO - automobile CNG fuel installations for LPG; BRC - - automobile CNG fuel installations for methane; ZETAESSE – copper pipe.

Up to June 2010, REMIX BULGARIA LTD has built up 36 CNG stations out of 80 CNG stations in Bulgaria with equipment from SICOM and BRC and it supports 6 CNG stations of other brands. Until the end of the year, REMIX BULGARIA LTD will also build up 10-15 CNG stations in different cities of the country, 10 of which are already delivered.

The main advantages of the CNG filling stations of SICOM and BRC make are:

- The company has built-up loading station networks in many countries all over the world through the utilized modern technologies and high product quality.
- SICOM and BRC compressor stations are characterized with high capacity and low energy consumption, which is achieved through the utilization of most up-to-date technologies in the production of such equipment.
- SICOM and BRC are the only companies that are using Booster (additional smaller compressor) for fast filling of the filling pump container and reduction of the electric power expenses.
- The lowest price on Bulgarian market (the difference for a full set as compared to the other manufacturers, represented in Bulgaria exceeds 40000 euro.)
- Possibilities for operation within a broad range of input pressures (1-60 bar/g).

REMIX BULGARIA LTD does not only act as sales agent, but also performs erection, commissioning, and provides guarantee and post-guarantee maintenance of the equipment 24-hours a day, through highly qualified personnel, that has been trained at SICOM and BRC plants in Italy. REMIX BULGARIA LTD provides appropriate training and instruction of your personnel, working at the gas-filling station.

REMIX BULGARIA LTD as exclusive rep-

resentative for Bulgaria of the Italian companies SICOM and BRC has in storage the necessary quantity of spare parts for a period of more than 15 years since the CNG station has started. It also has qualified personnel for quick and qualified client service.

REMIX BULGARIA LTD offers the lowest prices of methane-based gas installations for all kinds of vehicles of BRC make, for which it is exclusive representative for Bulgaria.

Up to June 2010, about 80% of the converted automobiles working on methane are equipped with CNG systems of the BRC brand. The methane installations may be completed with CNG cylinders of CILBRAS, FABER or DALMINE from 20 to 150 l and comply with all safety requirements and EU standards.

REMIX BULGARIA LTD manufactures offers and rents cylinder batteries with capacity of 100 to 1200 nm³ and platforms and semi-trailers for transport of CNG with capacity of 2000 to 7000 nm³. Up to June 2010, REMIX BULGARIA LTD has manufactured and delivered to its clients 90 semi-trailers and platforms and more than 500 cylinder batteries.

REMIX BULGARIA LTD has introduced and implemented a Quality management system according to ISO 9001:2000 with a scope of application: Design, manufacturing and selling of cylinder batteries, trailers and semi-trailers for storage and transport of CNG, building and maintenance of CNG stations.

REMIX BULGARIA LTD performs in Bulgaria conversion of diesel and turbo-diesel truck and bus engines to methane-diesel by Italian technology with basic components of BRC brand. All basic components (reductor, electric valves, turn-cock, steel pipe and CNG cylinders etc.) are Italian, as for the installation, the manufacturing of additional components and the adjustment of the engine are made in Bulgaria in the Remix Bulgaria LTD specialized service-stations or at site upon client's request, providing after-sales and maintenance services. REMIX BULGARIA LTD may at client's desire provide a leasing scheme or a bank credit for station purchase or semi-trailers, meanwhile it guarantees in front of the corresponding institutions for the appropriate technical maintenance and the possibility of buy back of the equipment, before the before the end of the term for payment at additionally negotiated price.

Variant 1/A. Three axle semi trailer ADR T PED SCHMITZ CARGOBULL type SPL 24/L-13.62 EB for transportation of sections of cylinders for compressed natural gas type BS 20 P200 – 5062 with dimensions length/width/height in cm – 1362/248/300 with installed 225 cylinders of the DALMINE brand each with capacity of 90 liters with dimensions: diameter 273 mm; length 1847 mm; weight 85 kg. horizontally connected in 5 groups (each with its own brake fixture) together with tronkets (tee-joints) and fittings for a steel tube Ø 12x2 equipped with brake and measuring fixture with a total volume of 5062,5 nm³. Weight with filled cylinders and trailer – 29000 kg. Very functional for middle and large scale industrial customers.

Unit price with no VAT added: 120 000 Eur.

Rent for one-year contract: price per month with no VAT added: 3 000, 00 Eur.

Variant 1/B. Three axle semi trailer ADR T PED SCHMITZ CARGOBULL type SPL 24/L-13.62 EB for transportation of sections of cylinders for compressed natural gas type BS 20 P200 – 5962 with dimensions length/width/height in cm – 1362/248/320 with installed 265 cylinders of the DALMINE brand each with capacity of 90 liters with dimensions: diameter 273 mm; length 1847 mm; weight 85 kg. horizontally connected in 5 groups (each with its own brake fixture) together with tronkets (tee-joints) and fittings for a steel tube Ø 12x2 equipped with brake and measuring fixture with a total volume of 5962,5 nm³. Weight with filled cylinders and trailer – 33000 kg. Very functional for middle and large scale industrial customers.

Unit price with no VAT added: 135 000 Eur.

Rent for one-year contract: price per month with no VAT added: 4 000 Eur.

Variant 1/C. Three axle semi trailer ADR T PED SCHMITZ CARGOBULL type SPL 24/L-13.62 EB for transportation of sections of cylinders for compressed natural gas type BS 20 P200 – 5782 with dimensions length/width/height in cm – 1362/248/320 with installed 257 cylinders of the DALMINE brand each with capacity of 90 liters with dimensions: diameter 273 mm; length 1847 mm; weight 85 kg. horizontally connected in 5 groups (each with its own brake fixture) together with tronkets (tee-joints) and fittings for a steel tube Ø 12x2 equipped with brake and measuring fixture with a total volume of 5782,5 nm³. Weight with filled cylinders and trailer – 32200 kg. Very functional for middle and large scale industrial customers.

Unit price with no VAT added: 130 000 Eur.

Rent for one-year contract: price per month with no VAT added: 3 800 Eur.

Variant 2/A. Four legs BDF Platform SCHMITZ CARGOBULL type WCS 7.45 for transportation of sections of cylinders for compressed natural gas type BS 20 P200 – 2565 with dimensions length/width/height in cm – 745/248/250 with installed 114 cylinders of the DALMINE brand each with capacity of 90 liters with dimensions: diameter 273 mm; length 1847 mm; weight 85 kg. horizontally connected in 3 groups (each with its own brake fixture) together with tronkets (tee-joints) and fittings for a steel tube Ø 12x2 equipped with brake and measuring fixture with a total volume of 2565 nm³. Weight with filled cylinders and platform – 14000 kg. Very functional for middle and large scale industrial customers.

Unit price with no VAT added: 60 000 Eur.

Rent for one-year contract: price per month with no VAT added: 1 500 Eur.

All variants can be made with cylinders on working pressure 250 bars.
